Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither shows nor suggests a projection optical system having all of the elements of claim 1 and in particular, the following:

“a reference axis which is defined as a path of a central principal ray which is a principal ray of luminous flux from the center of the original image to the center of an image of the original image projected on the projection surface, the reference axis on an incident side and the reference axis on an emerging side of projection optical system are oblique to each other”.

The orientation of the reference axis as defined by the path of the principal ray of luminous flux at the incident side and the emerging side of the projection optical system is critical to the performance and size of the projection optical system.

The examiner interprets claim 13 to include each and every limitation of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Akiyama U.S. Patent 6,268,963 B1 teaches an optical system having a reflecting surface.

Rodgers U.S. Patent 5,309,276 teaches a catoptric optical system including concave and convex reflectors.

Kurioka et al. U.S. Patent Application Publication US 2004/0027662 A1 teaches a projection optical system, projection type image display apparatus, and image display system.

Sunaga U.S. Patent Application Publication US 2004/0105132 A1 teaches an imaging optical system and image reading apparatus using the same.
